

Drug Offender Reform Act: 10 Year Cost Estimates*

*Cost avoidance estimates are based on the report "Societal Outcomes and Cost Savings of Drug and Alcohol Treatment in the State of Oregon" completed by Dr. Michael Finigan with the Northwest Professional Consortium. In this study, it was estimated that for every dollar spent on treatment, \$5.60 in costs were avoided, including \$1.43 in justice costs, \$0.22 in public assistance costs, \$2.37 in theft losses, and \$1.58 in victim losses.
